Time machine

Current bid: **\$11.52** | Reserve met | Closes: Tue, 4 Oct [printer friendly page](#)Minimum next bid: \$ Autobid [Bid history](#)

Unfinished project.

Started making a machine to facilitate time travel, unfortunately I just don't have the time to complete it.

Have had mixed results, so no guarantees.

Would suit DIY handyman with quantum physics background or similar interest.

No time wasters please !

Would consider swap for anti-gravity machine

 **Ask the seller a question**

- Q** Do you have the flux capacitor to go with this? I can't see it in the photo.. *posted by: [studio1](#) (203 ) 5:06 pm, Tue 27 Sep*
- A** This model does not use a flux capacitor to reduce the time dilation effect. Are you sure you know what you are doing ?
-
- Q** Does this run on mains? What's the reserve? What will postage be to Palmerston North? *posted by: [izzy_dude](#) (56 ) 8:24 pm, Tue 27 Sep*
- A** The machine can be self powered if you can find a source of Uranium 235. Alternatively it can run of mains power supply. Postage anywhere in NZ, anytime \$5
-
- Q** haha. great stuff. +bids+ *posted by: [westyandseven](#) (37 ) 4:20 am, Wed 28 Sep*
- A** haha. If its so great why arent you bidding ?
-
- Q** I've got a space continuum transfunctioner. Would you consider swaping it for that? It's a bit rough and ready and blows a little blue smoke but appears to be running ok. *posted by: [allmypukunui](#) (8 ) 10:23 am, Wed 28 Sep*
- A** space continuum transfunctioners are old school. I used to have one and it blew blue smoke too, just before it blew up. Get rid of it now.
-
- Q** I'd like to go back & see my Great Uncle Rodney when he was 18 because he skulled a jug of beer in only 3.2 seconds & I'd certainly like to see that! I'm pretty sure that I have the necessary skills to complete the project too. I got a C+ in 4th form Science & two sticky red stars. *posted by: [mrshin](#) (146 ) 1:34 pm, Wed 28 Sep*
- A** Certainly an event worthy of time travel. And if any one can get this puppy working, its you - with your fancy two red stars, and forth form education.
-
- Q** Will this machine be capable of going forwards as well as backwards it time. I built one in 2052 that only went backwards and I haven't been able to get back to my time. I need one that can go boths ways so I can come back to this time to feed the cat I have. *posted by: [jd10](#) (94 ) 2:07 pm, Wed 28 Sep*

A interesting dilemma, but simply answered by the formula : $dt = dt' \cdot (1 - v^2/c^2)^{1/2}$ which i have designed the device around, in theory past and future travel should be possible. I have sympathy for you and your cat, but when amateurs play with time travel this is what happens.

Q i looove it... its a master piece in progress ;p *posted by: [moooon](#) (124 ★★)* 6:47 pm, Wed 28 Sep

A this is not a piece of conceptual art. it is a very serious quantum level time travelling device - well would be if it worked.

Q Does it have fast forward, rewind and pause? *posted by: [izzy_dude](#) (56 ★★)* 9:21 am, Thu 29 Sep

A Time is a little more complicated than fast forwarding, rewinding and pause. The time reference dilator is capable of such functions but the theory behind it is somewhat unproven. It does have an eject button if thats any help ?

Q Here's a curly question... If I traveled back in time to when I was ten years old, do you think it would be illegal for me to fondle my younger self? *posted by: [absolut](#) (13 ★★)* 2:13 pm, Thu 29 Sep

A in a court of law i believe what you are describing would be classed as Self pleasure, or perhaps self abuse Either way both are perfectly legal no matter what the age. If you were caught they would have issues proving it via DNA anyway

Q Back in '82, I used to be able to throw a pigskin a quarter mile. Would this machine be able to take me back in time so I could take State? *posted by: [nzjafa](#) (1 ★)* 3:10 pm, Thu 29 Sep

A you need to give up on your glory years, and live for the now. A quarter mile is pretty impressive though, is that for real ?

Q Does the eftpos machine work on Pre-pay time credits or pay as you travel? *posted by: [steve](#) (15 ★★)* 3:31 pm, Thu 29 Sep

A i see you have mistaken the time defliberator for an old eftpos machine. Easy mistake for beginners to time travel to make, they do look similar.

Q If I am successful with my bid, do you think there is sufficient grunt in the machine to go back to the beginning of this auction, wipe out all memory of it, so I don't have to pay you. *posted by: [bubbs29](#) (50 ★★)* 4:04 pm, Thu 29 Sep

A if the auction dosnt take place, you would never have the time machine, so you would be stuck in the past, with no machine to get back to the present. time is a dangerous thing to play with, and you really need to carefully consider the consequences, before you start mucking with the past, and breaching time continuation

Q I have half of my cheese and tomato sandwich left from lunch, would you consider a trade? *posted by: [adamstar](#) (2 ★)* 4:44 pm, Thu 29 Sep

A What kind of dressing ?
